

Essential Extra

Double up on speed and protection without doubling your costs with our wireless alarm signalling system. Making it perfect for protecting low-to-medium risk properties.

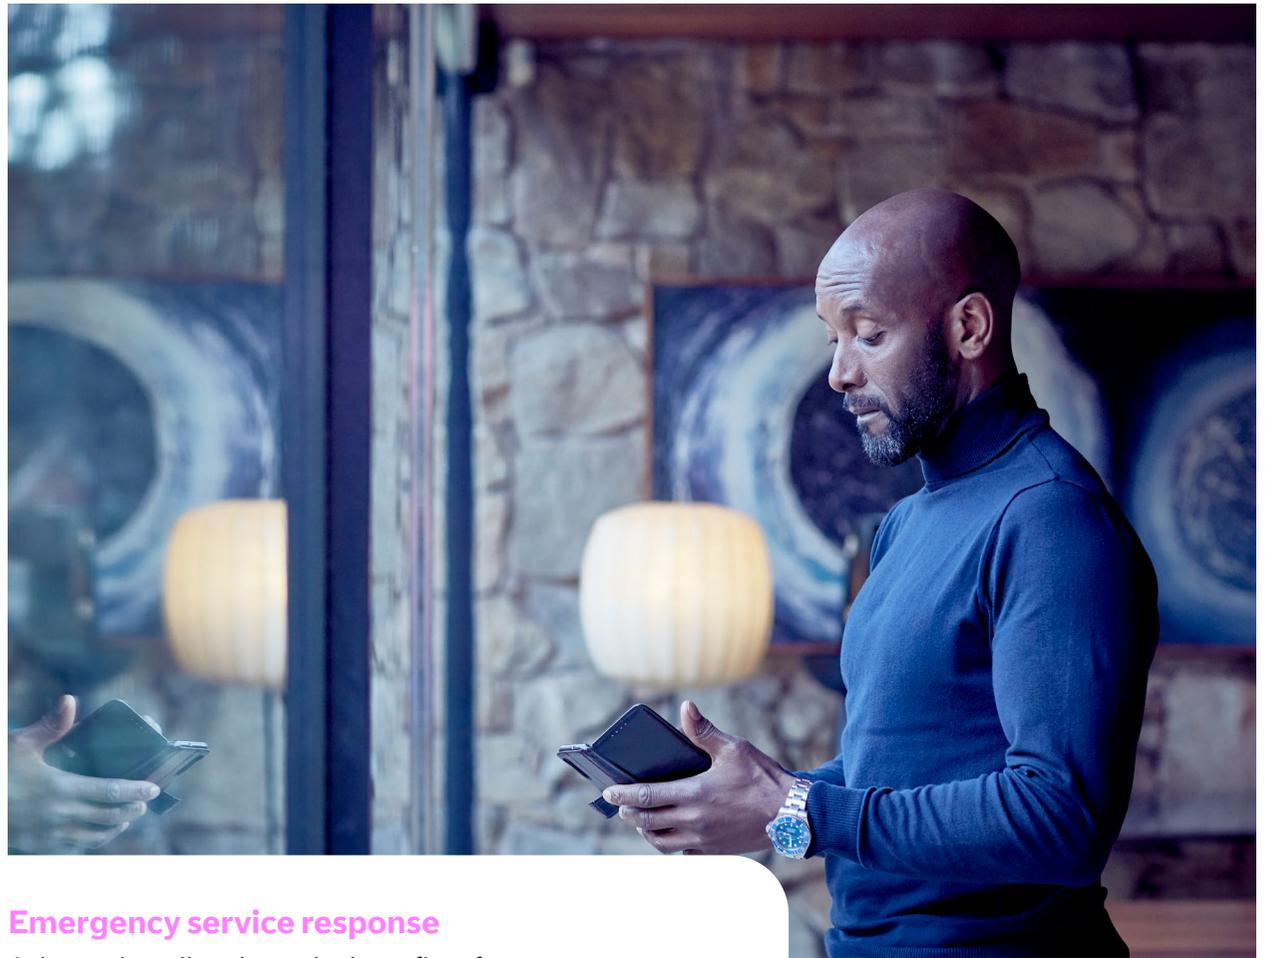

What does it do?

- It's monitored by experts that keep an eye on your property day and night. All year round.
- It uses superfast 4G mobile to send signals in seconds and report connectivity issues within 30 minutes.
- Stay connected no matter what happens with two fully monitored mobile connections, one that uses EE and one which can roam onto any of the other UK networks.
- Better protect your property with enhanced signalling and end-to-end encryption at a price everyone can afford.
- Get mobile alerts when your alarm goes off and more with support from the BT Redcare app.
- It's made from recyclable plastic, packaged in cardboard and uses little power. That's good for you, the environment – and your energy bill!
