

Essential IP

Keep security simple. Get affordable alarm signalling for low-to-medium risk properties that works over broadband.

What does it do?

- Essential IP works with your home or business broadband so you get a hassle-free set-up and a connection you can rely on.
- It's monitored by experts that keep an eye on your property day and night. All year round.
- Signals are sent in seconds and connectivity issues can be reported to the alarm receiving centre either within 60 minutes for lower risk properties or 3 minutes for those properties with higher risk.
- Better protect your property with enhanced signalling that sends more detailed information and is encrypted from end-to-end.
- Get mobile alerts when your alarm goes off and more with support from the BT Redcare app.

- Made from recyclable plastic, packaged in cardboard and uses little power. That's good for you, the environment – and your energy bill!

Police response

Ask your installer about the benefits of a police response with Essential IP.

We're a partner you can trust

We have more than 35 years' experience keeping homes and businesses safe. Our Next Generation alarm signalling systems are smarter, faster and future-ready. They can protect you no matter what your budget is or the risks you face. Plus, each one comes with a 10-year guarantee.
