

# Advanced and Advanced Extra

# Fast, flexible and ready for the future

Advanced and Advanced Extra give you home and business alarm signalling that can change with your needs. They come with two signalling paths for twice the reassurance. And it's monitored by experts that keep an eye on your property day and night. So if something triggers your alarm they'll know about it. Fast.

Advanced Extra comes with even faster reporting times.

That means if there's a fault with the connection, experts will know about it in just 180 seconds.

- With both an IP connection and two 4G SIMS, we've got you covered. No matter what.
- Along with fire and security signalling, Advanced and Advanced Extra can also cover things like gas and water monitoring.
- Our Next Generation products use less power and come in recyclable packaging. It's great news for the environment – and your utility bills.

## Redcare stands for reliable alarm signalling

We're at the heart of home and business security. We connect installers, alarm receiving centres and you.

We've been doing this for over 30 years. And we're part of BT. With our experience and their technology, you can trust us to keep your world safe and secure.

## Protect what matters most

There are some things you should never compromise on. That's why we've made our Next Generation alarm signalling systems faster and smarter than ever.

They're built to last. And they come with a ten-year guarantee for complete peace of mind.

To find an approved installer in your area, visit [redcare.bt.com](https://redcare.bt.com)
