

# Ultimate

# Strength and speed when you need it most

With Ultimate, you'll get our best alarm signalling system yet – for every level of risk. It uses a private IP connection and two 4G SIMs to make sure your signal is never compromised. There's battery backup in the alarm panel to keep things running, even in a power cut. And if that's not enough, enhanced monitoring means experts will know about any problems with your connection in just 90 seconds.

- With two reliable and totally secure ways to connect your alarm system, there's no stronger way to protect what matters most to you.
- As well as signalling for fire and security, you can get an extra layer of protection with alerts for things like gas leaks and floods.
- Ultimate's mobile connection reports just as fast as its private IP connection, when needed, so you'll get the same solid protection, no matter what.

## Redcare stands for reliable alarm signalling

We're at the heart of home and business security. We connect installers, alarm receiving centres and you.

We've been doing this for over 30 years. And we're part of BT. With our experience and their technology, you can trust us to keep your world safe and secure.

## Protect what matters most

There are some things you should never compromise on. That's why we've made our Next Generation alarm signalling systems faster and smarter than ever.

They're built to last. And they come with a ten-year guarantee for complete peace of mind.

To find an approved installer in your area, visit [redcare.bt.com](https://redcare.bt.com)
